

Augusto Amaral

Senior Software Engineer

 contact@augustoamaral.com  +55 22 9.98160-7639  linkedin.com/in/auamaral  github.com/AugustoAmaral  Campos dos Goytacazes, RJ, Brazil

PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of experience building scalable enterprise solutions for international markets. Expert in React, TypeScript, and Ruby on Rails with proven track record of implementing modern engineering practices, achieving 90%+ code coverage, and architecting complex full-stack applications. Specialized in monorepo architectures, automated testing frameworks, and data visualization for enterprise SaaS platforms.

PROFESSIONAL EXPERIENCE

Senior Software Engineer *Three60 Energy / Maiella, Norway/Italy*

February 2024 - October 2025

- Led frontend architecture development for premium business intelligence solutions in oil & gas industry
- Achieved 90%+ code coverage by implementing automated visual testing framework using Storybook, Playwright, and custom pixel-perfect comparison tools
- Architected end-to-end type safety system using Elysia + Eden Treaty, eliminating API contract bugs across monorepo
- Built complex data visualization dashboards with advanced filtering capabilities using React, TypeScript, and ECharts
- Pioneered adoption of cutting-edge technologies including Bun runtime, TanStack Router, and Moon build system
- Developed custom CI/CD pipelines with GitHub Actions and Azure DevOps, reducing build times through intelligent caching
- Mentored team members on React best practices and modern TypeScript patterns

Senior Software Engineer (Consultant) *Zoolatech / Procore, USA*

July 2022 - February 2024

- Served as senior consultant for Procore's flagship Rails and React application, a 20-year-old enterprise construction management platform
- Successfully navigated and enhanced massive legacy codebase while implementing modern engineering practices
- Delivered critical features for budget management module in complex multi-tenant architecture
- Reduced technical debt and improved test coverage to enterprise standards
- Collaborated directly with product managers and stakeholders to align technical solutions with business objectives

CTO & Co-founder *Avaliei!, Brazil*

May 2021 - July 2022

- Technical co-founder following Hacking.Rio 2019 victory, transformed hackathon concept into venture-backed startup
- Architected full-stack solutions and established engineering processes from ground up
- Led technical strategy in partnership with Vibra Energia S.A. to deliver scalable business solutions
- Achieved low operational costs through serverless architecture and automated deployment pipelines

Full Stack Engineer *Odda Digital System, Norway*

January 2019 - July 2022

- Built microservices architecture using Python and PHP, integrated with Microsoft Dynamics NAV
- Developed data visualization dashboards for mining processing companies (Tizir)
- Promoted from frontend to full-stack engineer within 6 months due to exceptional performance

TECHNICAL SKILLS

Expert (5+ years):

TypeScript, React.js, Ruby on Rails, Python, SQL, Node.js

Proficient:

Bun, TanStack Router, ECharts, Redux, Jest, Cypress, RSpec, MongoDB, PostgreSQL, Docker, Git, CI/CD, Azure DevOps

Frameworks & Tools:

Storybook, Playwright, Moon (monorepo), Elysia, Eden Treaty, Pulumi, New Relic, OAuth, Shell Script

EDUCATION

Bachelor of Computer Science

UENF - Universidade Estadual Norte Fluminense, Brazil | 2016 - 2025

Thesis: Comparative Analysis of Automatic Keyword Extraction Algorithms Using NLP Techniques

NOTABLE ACHIEVEMENTS

- **Hacking.Rio 2019 Winner:** Competed against 700+ participants, winning solution led to founding of Avaliei! with Vibra Energia S.A.
- **Stanford Code in Place 2020:** Selected for competitive global programming course, final project featured in official gallery
- **Technical Leadership:** Mentored multiple developers across different companies, establishing best practices and knowledge sharing
